Training & Experience

Full Stack Web Development Training (MERN Stack), *Geekster* [May 2024 – Aug 2025]

- Completed an intensive full-stack training covering **React, Node.js, Express.js, MongoDB, TypeScript, Next.js, and SQL**.
- Built full-stack applications including a **Threads-style social media platform** and a **Medium-like blogging platform with AI-powered features**.
- Secured **2nd Rank** with my team in a **Geekster Geekathon**, delivering a working full-stack solution under tight deadlines.

Projects

Threads (Full Stack) [Deployed Link | GitHub]

- Built a full-stack social media app inspired by Threads, with profiles, follow/unfollow, a personalized feed, likes, replies, and user search.
- Implemented JWT-based authentication and a forgot-password flow with email OTP verification.
- Built real-time one-to-one chat using Socket.io (WebSockets).
- Structured the backend with an MVC pattern, with separate routes for users, posts, and messages.
- Integrated Cloudinary for image uploads; deployed the frontend on Vercel and Render.
- **Tech:** MongoDB, Express, React, Node.js, Chakra UI, Socket.io, JWT, Cloudinary

Medium-Style Blogging Platform (Full Stack, AI-Powered) [Live Demo | GitHub]

- Built a Medium-style blogging platform with a rich-text editor (JSON output), comments, likes, and a personalized feed, using Mongoose schemas (User, Post, Comment).
- Developed a " **Trending Posts"** feature with MongoDB **aggregation pipelines**, plus server-side pagination, filtering, and text search.
- Secured auth with HTTP-only cookies and short-lived access/refresh tokens with rotation; handled image uploads via Multer and Cloudinary/S3.
- Used TanStack Query for caching and optimistic updates with rollback, and added debounced draft auto-save and real-time Socket.io notifications.
- Integrated an **LLM API** through secure backend routes for **article summaries.**
- **Tech:** MongoDB, Express, React, Node.js, TanStack Query, Socket.io, Cloudinary, JWT, OpenAI/Claude/Gemini API

Skills

- **Languages:** JavaScript, TypeScript, C++, SQL
- **Frontend:** React, Next.js, Redux Toolkit, TanStack Query, Tailwind CSS
- **Backend & Databases:** Node.js, Express.js, MongoDB, SQL, REST APIs, Socket.io, JWT
- **Tools:** Git, GitHub, VS Code, Firebase, Cloudinary

Education

Year	Degree/Examination	Institution/ Board	CGPA/Percentage
2024	B. Tech	RTU, KOTA	8.89 CGPA
2020	12th	RBSE	75.23%

Achievements and Co-Curricular Activities

- Ranked 1st in Geekster's coding challenge (October 2024).
- Achieved a 5-star rating in the Hacker Rank Problem-Solving assessment.
- Secured top 10% performance in Geekathons for innovative solutions in MERN-based projects.
